Ready to get started?

Before you can start the Deep Learning Fundamentals Lab, you need to take an Admissions Quiz.

As a reminder, applicants are expected to have the following prerequisite skills:

- Basic linear algebra (i.e., matrices, vectors, and matrix operations)
- Basic calculus concepts (i.e., function analysis, derivatives, gradients, etc.)
- Basic probability and statistics functions
- **Intermediate-level Python programming**, including: basic data structures like arrays and dictionaries, the ability to write definitions for functions and classes, and familiarity with data manipulation using libraries like NumPy and Pandas.
- Familiarity with essential machine learning concepts, including supervised and unsupervised learning, overfitting and regularization, and training, validation, and test sets.

The Admissions Quiz is composed of **24 questions**, and the minimum passing grade is **70%**. The time limit is **45 minutes** and it must be completed **in one sitting**. You have a **maximum of two (2) attempts** to complete the test.

The Admissions Quiz covers 4 main topics (6 questions for each topic): linear algebra, calculus, probability and statistics. And Python programming.

How can I prepare for the Quiz?

Before you attempt the quiz, we strongly encourage you to consider these highly recommended (and free!) online resources we have curated to help you prepare:

- [Mathematics for Machine Learning](#): Comprehensive coverage of linear algebra, calculus, and probability.
- [Algebra Basics at Khan Academy](#): Foundations, algebraic expressions, linear equations and inequalities, graphing lines and slope
- [Statistics and Probability at Khan Academy](#): Displaying and comparing quantitative data, summarizing quantitative data, modeling data distributions.
- [Python at LearnPython.org](#): Learn the Basics
- [Applied Data Science Lab](#): WQU's own Applied Data Science Lab is free and always available. The Applied Data Science Lab teaches you the Python and Machine Learning skills needed to succeed in the Deep Learning Fundamentals Lab.

Important: Complete this quiz using only your current knowledge

This admissions quiz is designed to assess whether you have the foundational knowledge needed to succeed in the Lab. Please complete it without using any external resources.

Why this matters? The Admissions Quiz difficulty is carefully calibrated to predict your success in the Lab. If you need external help to pass it, you'll likely struggle and may not be able to complete the program successfully.

We want you to succeed! Taking the quiz honestly helps ensure you're ready for the learning journey ahead and will be able to earn your certificate.

Good luck! 🍀
