

6 Code Task 1.0.4.1

This task asks you to compute the output of a simple linear system with fixed weights and biases.

You must assign the result to a variable named `y_fixed`. Full details are provided in the notebook cells below.

Recheck Activity Correct

✓ `y_fixed` is correct!

7 Multiple Choice Question 1.0.4.1

What happens to $\exp(x)$ as $x \rightarrow +\infty$?

- ☐ It approaches 0
- ☐ It becomes negative
- ☐ It oscillates between -1 and 1
- ☒ It grows without bound

Submitted Correct

8 Multiple Choice Question 1.0.4.2

What happens to $\log(x)$ as $x \rightarrow 0^+$?

- ☐ It approaches $+\infty$
- ☐ It stays constant
- ☐ It becomes undefined for positive x
- ☒ It goes to $-\infty$

Submitted Correct
